NARRATIVE

This survey was performed at the request of Greg Todd in order to find and locate on the ground the North line of the NW 1/4 of the SW 1/4 of Section 27.

The monuments used for this survey marking the Public Land Survey System (PLSS) corners were found as noted on the plat and used to control this survey. The Standard Section Subdivision procedure was used to determine the position of the aliquot part corners within the section.

This plat represents a dependent resurvey and a subdivision of portions of Section 27, and is designed to restore the PLSS corners to their true original locations according to the best available evidence and according to the data returned on the official General Land Office Plat.

The Basis of Bearings for this survey is based on WCS-84 datum which gives a bearing of North 89°59'39" West between the Southeast Section Corner and the South 1/4 Corner of said section.
